Microsoft's official client is very bare bones and doesn't support connecting on non-standard ports (which I need).. Mozilla thunderbird Setup icloud email on mail client for mac I administer a number of Windows machines, and am trying to find a really good application to remote desktop in to them from my Mac.. Unfortunately, it's just too buggy for serious use, and given that it averages less than 2 releases a year, I have little hope that that will change.

I've tried CoRD, and I really like its library approach to saved sessions (as opposed to Microsoft's file based approach), and tabbed sessions are great when working on a bunch of machines.
